## 1. TECHNICAL DATA

### 1.1 INTRODUCTION

"FIELDKING" 'dabangg cultivator type rigid tiller is designed for tougher operations. It is suitable for varying hard soil conditions. Dabangg rigid forged tyne assemblies derive their strength from heavy duty solid bar, new casted Brackets which once bolted to the immensely strong main frame, cannot move or strain out of position. Spacing of the tynes is changed simply by slackening the bolts and sliding the brackets to the desired position. Height of the tynes can also be adjusted.

Company's decisions in this respect will be final and binding on all.

11. The above warranty is in lieu of all other warranties express or implied, and no person, agent or representative of the company is authorized to give any other warranties on the company's behalf or the assume for it any other liability in connection, with the product.

12. The court at Karnal shall have exclusive jurisdiction to try, entertain and dispose of all proceeding relating to any dispute arising between the company and the retail purchaser on the liability of the company under this warranty.

### 1.3 WHEN THE WARRANTY BECOMES VOID

1. Besides the caused specified in the supply agreement, the warranty shall in any case become void.
2. Should there have been a maneuver error.
3. When following repairs made by the customer without authorization from the manufacture or owing to the installation of spurious spare parts, the machine is subject to variations and the damage can be ascribed to these variations.
4. When the user failed to comply with the instructions in the operator's handbook.
5. When the implement has been used beyond the specified power limit like (tractor horse power).
6. No warranty will be given if the service is not done on time.

### 1.4 WARNING

Thoroughly read the instruction manual before proceeding with the various operations.  
Maintain the harrow as per the instructions of this handbook to be entitled for warranty.

## 2. USAGE INSTRUCTIONS

### 2.1 BEFORE USE & ADJUSTMENTS

Before mounting of cultivator make sure that all nuts & bolts are properly secured. Also determine soil and trash conditions of the field and make the preliminary adjustments. e.g.

#### Tyne leveling

To eliminate uneven working and side draft, leveling is done by means of top link.

## Depth control

The depth at which the implement is required to work is controlled hydraulically by raising or lowering the control lever on the tractor.

## 2.2 ATTACHING THE CULTIVATOR TO THE TRACTOR

1. Place the cultivator duly leveled on the flat piece of land.
2. Reverse the tractor to the cultivator (Do not drag the cultivator up the tractor)
3. Attach the left arm of the tractor to the cultivator first.
4. Attach the central arm to the cultivator. To attach, turn the screws on both sides to an equal length. If the arm is too short or too long, turn the screw to adjust both at the same time until aligned with the hole on the central arm.
5. Attach the lower right arm, turn the screw until the mounting pin is at the same level as the hole on the tractor arm. If the gap between the hole and mounting pin is too close or too distant, turn the control arm in or pull it away to an appropriate distance. You may have to adjust both height and distance at the same time. When the hole at tractor arm and mounting pin are even, insert the pin in the hole and lock it with the lynch pin.
6. After attaching the cultivator, lift it and adjust the control arm parallel to the ground. When you look from both rear or sideways, all shovel should be touching the ground uniformly.

### **Danger:**

In operating position the top link must be higher on the machine side than on the tractor side!

## 2.3 SAFETY

### **REMEMBER SAFETY FIRST**

Operator must read the instruction manual before operating the cultivator. Do not allow anyone to operate this equipment who has not fully read and comprehended this manual and who has not been properly trained in the safe operation of the equipment.

## SAFETY INSTRUCTIONS:

1. All equipment is potentially hazardous. There is no substitute for a safety conscious operator who recognizes potential hazards and follows reasonable safety practices.
2. Personal protection equipment including safety glasses, safety shoes, and gloves are recommended during assembly, installation, operation, adjustment, maintaining, repairing, removal or moving the implement.
3. Never place yourself between the tractor and implement while implement is in operation.
4. Do not work under a raised implement unless it is securely blocked or held in position. Do not depend on the tractor hydraulic system to hold the implement in place.
5. A heavy load can cause instability of the tractor. Use extreme care during travel. Slow down on turns and watch out for bumps. The tractor may need front counter-weights to counter-balance the weight of the implement.
6. Do not allow others to ride on the tractor with an operator. Riders are subject to injury such as being struck by foreign objects or being thrown off. Riders obstruct the operator's view resulting in unsafe operation. Never allow anyone to ride on the implement!
7. Do not allow anyone who is not familiar with the safety rules and operation instructions to use this implement.
8. Keep alert and watch the front as well as the rear when working with equipment.
9. Always be sure the implement is in the fully raised position when in transport.
10. When removing or adjusting equipment, be sure that your feet are never under the implement.
11. Avoid excessive speed during operation.
12. Before you operate the field cultivator, check over all pins, bolts and connections to be sure that all are securely in place. Replace any damaged or worn parts immediately.
13. Make implement adjustments only when the implement is attached to the tractor.
14. Watch for and avoid hidden obstructions, i.e. buried pipes, rocks, uneven concrete slabs, stumps etc., when operating equipment.
15. Never operate tractor and implement under trees with low hanging limbs. Operators can be knocked off the tractor and then run over by the implement.
16. Operating rigid cultivator shanks may suddenly fling rocks and clods. Keep all bystanders 10 meter away and operator must wear safety glasses.
17. Reduce speed when transporting mounted implements to avoid bouncing and momentary loss of steering control.
18. It may be necessary to raise implement slightly and then lower to desired working depth when tractor is moving.

19. Use extra care when working on slopes.
20. Never use alcoholic beverages or drugs which can hinder alertness or coordination while operating this equipment. Consult your doctor about operating this machine while taking prescription medications.

Non-observance of the above rules shall be considered negligence. It will rule out any liability of the manufacturer for all possible damage and / or consequences.  
The user is solely responsible for any risk!

### 3. MAINTENANCE

#### 3.1 OPERATION, CARE & MAINTENANCE OF CULTIVATOR

1. All the shovels of the tynes should be set at equal depth. To do this, place the cultivator on level ground and see that all the shovel touch the ground.
2. Before commencing work with a cultivator, check it for loose bolts and nuts and fasten them properly. After having taken all these precautions, run the cultivator for one hour and then inspect it once more for any loose parts.
3. Never turn or reverse your tractor while cultivator is ploughed deep in field. This will twist the assemblies out of alignment and damage them extensively.
4. Reverse or replace the shovel point when worn out. Delay may result in wearing out of the tynes which will result into expensive repairing/replacements. Avoid use of extra wide shovels as they do not improve tillage quality but only put extra load on the tractor and also result into extra fuel consumption.

#### 3.2. STORAGE OF CULTIVATOR AFTER WORK

1. Wash the cultivator after work.
2. Replace the worn out nuts & bolts.
3. If cultivator has to remain unused for long time then clean it & apply a layer of used oil for rust prevention.
4. These steps will enhance the life of your cultivator.
